

Dissection of wind power generation pitch system

Overview

By adjusting the angle of a turbine's blades, the pitch system controls how much energy the blades can extract.

DISSECTION Definition & Meaning

The meaning of DISSECTION is the act or process of dissecting : the state of being dissected.

[Pitch system concepts and design , Wind Turbine System Design.](#)

The pitch system allows for turning the rotor blades of the wind turbine about their

longitudinal axes. This turning movement is commonly called pitching and controls the aerodynamic

How a Wind Turbine Works

Variable-pitch turbines can limit power either by pitching to "stall" or to "feather," and fixed-pitch turbines typically limit power by entering the aerodynamic stall regime above rated wind speed.

Dissect: MedlinePlus Medical Encyclopedia

Dissect Dissect means to cut or separate tissues. Surgeons dissect tissue during surgery. Most of the time, this is done to remove a part of the body that is thought to be diseased.
