

Electric artifact installed with photovoltaic panels

Overview

Solar Electric Sculptures were designed as functional public art projects that generate electricity from sunlight (for the community in which they are installed) through the integration of a large photovoltaic panel, built into the sculpture. The structures vary in size, and are all.

Photovoltaics and electricity

Solar photovoltaic cells are grouped in panels, and panels can be grouped into arrays of different sizes to power water pumps, power individual homes, or provide utility-scale electricity generation.
