

Is Nepal's energy storage off-grid or on-grid

Overview

Renewable energy in Nepal comes from hydropower, solar energy, biomass, biogas, and wind energy. Nepal has favorable solar resources, receiving average solar radiation of 3.6 to 6.2 kW/m /day. Sunshine duration is around three hundred days per year or 6.8 hours per day, equivalent to approximately 2100 hours annually. This indicates good potential for solar power generation across most regions in Nepal. Nepal's favorable solar resources have attracted interest in solar technology due to their relatively low.

Is Nepal's energy storage off-grid or on-grid
