

Mobile engineering power supply level 3 box

Overview

The MEPDIS-R provides a flexible, modular, recoverable, safe power distribution capability. The 30kW PDS has two 100 Amp input receptacles to permit load paralleling and load transfer.

Power pedestals

A power pedestal is a device designed for outdoor service to meet temporary power requirements at construction sites, marinas, recreational vehicle (RV parks, marinas and mobile home parks).

Power Supplies

Switching supplies are lightweight and portable, but they use cooling fans that can contribute to a noisy environment. Conversely, heavy-duty linear power supplies use a larger, heavier transformer. That

adopts a plug-in method, which is more convenient and practical than traditional terminal wiring. The built-in circuit
