### **How to open link in a new tab in HTML?**

Note I previously suggested blank instead of `_blank` because, if used, it'll open a new tab and then use the same tab if the link is clicked again. However, this is only because, as GolezTrol

### [Difference between 'new operator' and 'operator new'?](#)

A new expression is the whole phrase that begins with new. So what do you call just the "new" part of it? If it's wrong to call that the new operator, then we should not call "sizeof" the sizeof

### [How does the new operator work in JavaScript?](#)

## [How do I push a new local branch to a remote Git repository and track](#)

How do I: Create a local branch from another branch (via git branch or git checkout -b). Push the local branch to the remote repository (i.e. publish), but make it trackable so that git pull and

## **When to use "new" and when not to, in C++?**

You should use new when you wish an object to remain in existence until you delete it. If you do not use new then the object will be destroyed when it goes out of scope.

## [Is JavaScript's "new" keyword considered harmful?](#)

It is NOT 'bad' to use the new keyword. But if you forget it, you will be calling the object constructor as a regular function. If your constructor doesn't check its execution context then it won't notice that 'this'
