

Russian iron flow battery energy

Overview

Iron flow battery-based storage solutions have recently made a historical breakthrough to counter some of the disadvantages of lithium-ion battery solutions. They offer a safe, non-flammable, non-explosive, high power density, and cost-effective energy storage solution.

as Iron Salt Battery (ISB), stores and releases energy through the electrochemical reaction of iron salt. This type of battery belongs to the class of redox-flow batteries (RFB), which are alternative solutions to Lithium-Ion Batteries (LIB) for stationary applications. The IRFB can achieve up to 70% round trip energy efficiency. In comparison, other long duration storage technologies such as pumped hydro energy storage provide around 80% round trip energy efficiency .
