The solar cell wafering process

The multi-wire sawing technique used to manufacture wafers for crystalline silicon solar cells, with the reduction of kerf loss currently representing about 50% of the silicon, presents

How a Photovoltaic Cell Works

If the PV cell is placed in the sun, photons of light strike the electrons in the p-n junction and energize them, knocking them free of their atoms. These electrons are attracted to the positive charge in the n

1 question, what is the max size a schematic can be. Or is it just infinite? The limit of the schematic format is 65536x65536x65536 I believe. In Minecraft that basically means
