Solar Water Heaters

Solar water heating systems include storage tanks and solar collectors. There are two types of solar water heating systems: active, which have circulating pumps and controls, and passive, which don't.

Solar Boiler

The Solar Boiler is used as a domestic water pre-heater in conjunction with your conventional heating system. Cold water enters the Solar Boiler for initial heating, and is then delivered to the backup or

Solar water heating

Solar water heating (SWH) is heating water by sunlight, using a solar thermal collector. A variety of configurations are available at varying cost to provide solutions in different climates and latitudes.

How Solar PV Panels Work with Boilers

By pairing solar PV panels with a system boiler, the electricity generated can directly power the immersion heater, reducing the need for grid electricity and minimising gas boiler usage.
