[Where to download Linux Kernel source code of a specific version](#)

Is there a resource to download a specific kernel version source? For example, I want to get 2.6.36.2 sources to compare with this package and see what changes were introduced?

[How to compile and install programs from source](#)

That being said +1 bump for asking a common question that should be answered for all newcomers to *nix systems. :) Building from source sometimes means the difference between fixing a nasty bug

bash script error: source: not found

You have an alias which is overriding the builtin source (fix with unalias source) You have a function which is overriding source (fix with unset -f source) You are somehow not using bash (although your

convert executable back to C source code

Unfortunately I lost my source code and I just have the output file that made with gcc in linux and I don't have any access to my pc now.is there any way to convert output file to source file

Why can 'BASH_SOURCE' be used to obtain the current directory of

I've read that BASH_SOURCE should be populated with the name of the executing script (and it works!). But why does BASH_SOURCE hold the name of the executing script, when it is

"-works,-why-is-"source-"-throwing-an-error?/">If "bash " works, why is "source " throwing an error?

However, when you source something, it is run in your current shell which, because it is interactive, has already loaded the aliases and therefore the fi alias is recognized and breaks the

Copy file to same path as source without changing directories

For example if you started typing or copy/pasting the source path including filename, and only after that you realize you want the copy to be in that directory, ctrl-left-arrow to move the cursor

Is there an open source tool to measure cpu performance?

I have used many times ab for measuring web performance, hdparm for measuring hard disk performance and netperf for measuring network performance. But I didn't find any tools to measure

What is the difference between "." "./" and "source"?

When the script is done, any changes that it

Auxin Solar - Welcome to Auxin Solar
