

The UK's first battery energy storage system

Overview

Located in Oxford, UK, the new system integrates energy storage, electric vehicle charging, low carbon heating and smart energy management technology to decarbonise Oxford by 2040. The system is the first to go live as part of Pivot Power's plans to deploy up to 40 similar systems.

Battery energy storage systems (BESS)

This briefing covers battery energy storage systems (BESS), concerns about their safety and barriers to their deployment.
