Solar Power Purchase Agreements - SEIA

What Is A Solar Power Purchase Agreement? Benefits of Ppas to Solar Customers Market Adoption and Policy PPA Considerations A solar power purchase agreement (PPA) is a financial agreement where a developer arranges for the design, permitting, financing and installation of a solar energy system on a customer's property at little to no cost. The developer sells the power generated to the host customer at a fixed rate that is typically lower than the local utility's retail See more on seia Rural Development

How do you clear the SQL Server transaction log?

The transaction log contains a lot of useful data that can be read using a third-party transaction log reader (it can be read manually but with extreme effort though). The transaction log is

Transaction marked as rollback only: How do I find the cause

Participating transaction failed - marking existing transaction as rollback-only So I just stepped through my code to see where this line is generated and found that there is a catch block

What does a transaction around a single statement do?

BEGIN TRANSACTION / COMMIT "extends" this locking functionality to the work done by multiple statements, but it adds nothing to single statements. However, the database transaction log is

The transaction manager has disabled its support for remote/network

The partner transaction manager has disabled its support for remote/network transactions*
Jumping over to SQL Client did fix my issue, which also confirmed for me that it was an EF thing.
