

# UPS battery cabinet does not need grounding

## Overview

---

The APC UPS body, its casing, battery cabinet (rack), etc. need to be connected to the electrical grounding device using grounding wires.

## UPS battery cabinet does not need grounding

---

### [/15/20KVA UPS Battery Cabinet Installation and Operation Manual](#)

Do not disconnect the battery connectors under load under any circumstances. Battery replacement and external battery cabinet installation shall be handled by qualified SERVICE PERSONNEL only.

### [Is it okay to use a UPS without a ground?](#)

To answer your question succinctly, no, it should not harm your UPS not having a ground but it could potentially harm you. It may also introduce "peculiar" networking errors, especially if your are fully

### **Is ungrounded UPS a risk?**

The lack of a ground doesn't increase the fire risk unless there's faulty wiring, but shock risks could arise with certain equipment faults. If rewiring isn't an option, your setup is as safe as it

### [Understanding Neutral Earthing in UPS Systems](#)

According to some experts, the UPS neutral requires a separate earthing connection. Is that correct? This is something we'll look into further in this piece. To further understand the topic, we'll start by

## [Transformerless UPS Neutral & Grounding Guide](#)

Learn about neutral handling and grounding in Eaton transformerless UPS applications. Covers installation, design, and fault handling.

## [If I'm Mainly Using the UPS for battery back up, do I](#)

Many UPS models require a ground connection to power up, and if they don't

## **Solved: no electricity grounding**
