

# UPS battery cabinet interval

 **TAX FREE**    

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

ENERGY STORAGE SYSTEM

The image shows a white, rectangular energy storage cabinet with a green vertical stripe on the right side. The cabinet has a door on the left with a handle and a lock. There are three small red lights on the top left of the door. The text 'ENERGY STORAGE SYSTEM' is printed in green on the front panel. The cabinet is shown from a three-quarter perspective against a light gray background.

## Overview

---

Replace a UPS battery every 3-5 years to ensure optimal performance. Regular checks can help identify early signs of wear.

## UPS battery cabinet interval

---

### UPS Best Practices & Battery Basics

The UPS automatically charges internal batteries when connected to utility power, however, if in storage, the UPS batteries should be charged every 90 days for 8 hours minimum
