

# **Wireless communication equipment does not require a base station**

## Overview

---

In practical terms, a jobsite communication system without infrastructure removes the need for on-site repeater towers, base stations, or complex radio network buildouts.

## Wireless communication equipment does not require a base station

---

### [Wireless communication equipment does not require a base station](#)

A base station is fundamental in wireless communication, because it facilitates the connection between your device and the wider network. Without base stations, mobile data and voice services would be
